(54) Title: DATA REQUESTING AND TRANSMITTING DEVICES AND PROCESSES

(57) Abstract: The present invention concerns data requesting and transmitting devices and processes. It relates notably to a data transmitting device (1) comprising means for receiving (11) requests (REQU) of determined data from a requesting device, specification means (12) for determining at least one size of successive portions of those data, and means for triggering streaming (13) of the data portions to the requesting device. The receiving means receive information (INFO) representative of capacities of the requesting device, and the specification means (12) determine the portion size and at least one delay between two successive sending steps of those portions, in function of that information. Thus, the streaming means periodically trigger streaming of the data portions, with a period equal to that delay Application to VOD.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *G* document member of the same patent family
